Terms and Conditions

Information on physical characteristics is based upon tests we believe to be reliable. The values listed herein are typical values and are not for use in specifications. They are intended only as a source of information and are given without guarantee and do not constitute a warranty. Purchasers should independently determine, prior to use, the suitability of any material for their specific use. All technical data is subject to change without prior notice.

Description:

A 3 mil double sided white mounting film coated with a permanent acrylic adhesive, backed with a 90# liner. This mounting material is ideal for permanent mounting of photographs, prints, drawings or other images on smooth plastic, metal, or foam PVC resin. The white carrier film minimizes the visibility of the substrate and therefore optimizes the image quality, especially in case of thin papers (e.g. electrostatic prints).
